I was brought on as a contract worker to help meet a critical deadlines

- implemented a Rewards feature to allow customers to redeem loyalty points
- implemented a github-first development process as PM
- implemented a high-level testing framework

software engineer, [OpenGov](#) **November, 2016 - March, 2020**

I worked with a team to decompose a monolithic Rails app into a series of Typescript microservices.

- used TS to build an open-source, functional and type-safe framework used by many teams within OpenGov
- used Node/TS to build microservice backends
- used TS with Redux, Reselect and React to build frontend SPAs
- implemented charts in D3 to visualize financial reports
- developed a continuous integration and delivery process with Jenkins and Docker
- deployed our apps to AWS via Kubernetes

full stack developer, [Chroma](#) **February, 2015 - August, 2016**

I engineered the Meteor app "Chroma Fund", a marketplace lending platform providing investors with bundles of small business loans.

- responsible for designing UX and UI as well as implementing front-end
- supported blockchain verifiable transactions
- attended TechStars Summer 2016 accelerator program in NYC

Ruby on Rails developer, [Hubbub Health](#) **May, 2013 - February, 2015**

I worked with a large team to incentivize employee wellness with the RoR app, hubbubhealth.com.

- wrote Javascript for both modern and legacy browsers
- debugged user-submitted errors with New Relic and Papertrail
- managed assets via Amazon S3
- revived an out of date Rspec and Cucumber test suite for continuous integration
- optimized high traffic queries by replacing ActiveRecord calls with raw SQL
