 - React, React Native, Rails, Android
 - Kubernetes, Docker
 - Amazon AWS, Heroku, Jenkins
 - BDD, TDD, Agile methodologies
-

freelance web3 developer

I am currently working with <https://liquidcollections.com/> to develop NFTs which are redeemable for consumer goods.

- Maintained an extensive set of frontend and backend TS infrastructure
- Wrote and tested custom solidity code to create dynamic on-chain metadata.
- <https://opensea.io/assets/ethereum/0xa983d04c0fca6ab46452fe6281a1fcd7f982e3f5/0>

engineer, customer success @ [Chroma](#)

January, 2021 - August 2022

I returned to Chroma to develop Signet.code, a cannabis packaging application.

- ran Rewards programs wherein NFTs were attached to cannabis products, to be claimed by customers
- implemented a PDF generator capable of producing unique labels at high scale
- managed customer relations to produce dynamic labels
- integrated node with multiple external APIs and our cross-platform react-native app with external SDKs

software engineer @ [OpenGov](#)

November, 2016 - March, 2020

I worked with a team to decompose a monolithic Rails app into a series of Typescript microservices.

- used TS to build an open-source, functional and type-safe framework used by many teams within OpenGov
- used Node/TS to build microservice backends
- used TS with Redux, Reselect and React to build frontend SPAs
- implemented charts in D3 to visualize financial reports
- developed a continuous integration and delivery process with Jenkins and Docker
- deployed our apps to AWS via Kubernetes

full stack developer @ [Chroma Fund](#)

February, 2015 - August, 2016

I engineered the Meteor app "Chroma Fund", a marketplace lending platform providing investors with bundles of small business loans.

- responsible for designing UX and UI as well as implementing front-end
- supported blockchain verifiable transactions
- attended TechStars Summer 2016 accelerator program in NYC

Ruby on Rails developer @ [Hubbub Health](#)

May, 2013 - February, 2015

I worked with a large team to incentivize employee wellness with the RoR app, hubbubhealth.com.

- wrote Javascript for both modern and legacy browsers
- debugged user-submitted errors with New Relic and Papertrail
- managed assets via Amazon S3
- revived an out of date Rspec and Cucumber test suite for continuous integration
- optimized high traffic queries by replacing ActiveRecord calls with raw SQL
