Adam Wong

adamwong246@gmail.com

Portland, Oregon
BA of Computer Science, USC

- AWS Certified Cloud Practitioner
- Typescript/JavaScript/Node, Golang, Java/Kotlin, Ruby, Rust, Lua, Solidity
- · React, Rails, Android
- Kubernetes, Docker
- BDD, TDD, Agile methodologies

freelance developer @ <u>Testeranto</u> January 2024 - Current

I developed an Al-first, Acceptance Test Driven Development Typescript test framework.

software engineer @ Piton Labs February 2023 - October 2024

I joined Piton Labs to manage the development of the Accion Opportunity Fund.

- Integrated a severless NextJs app with AWS services
- Managed a cross-team collaboration between PitonLabs and AOF
- Developed a integration test suite as part of the CICD system
- Managed the i18n translation project

freelance web3 developer August 2022 - January 2023

I worked with <u>liquid collections</u> to develop NFTs which are redeemable for consumer goods.

- Maintained an extensive set of frontend and backend TS infrastructure
- Wrote and tested custom solidity code to create <u>dynamic on-chain metadata</u>.

engineer, customer success @ Chroma January, 2021 - August 2022

I returned to Chroma to develop Signet.code, a cannabis packaging application.

- ran Rewards programs wherein NFTs were attached to cannabis products, to be claimed by customers
- implemented a PDF generator capable of producing unique labels at high scale
- managed customer relations to produce dynamic labels
- integrated node with multiple external APIs and our cross-platform react-native app with external SDKs

software engineer @ OpenGov November, 2016 - March, 2020

I worked with a team to decompose a monolithic Rails app into a series of Typescript microservices.

- used TS to build an open-source, functional and type-safe framework used by many teams within OpenGov
- used Node/TS to build microservice backends

- used TS with Redux, Reselect and React to build frontend SPAs
- implemented charts in D3 to visualize financial reports
- developed a continuous integration and delivery process with Jenkins and Docker
- deployed our apps to AWS via Kubernetes

full stack developer @ Chroma Fund February, 2015 - August, 2016

I engineered the Meteor app "Chroma Fund", a marketplace lending platform providing investors with bundles of small business loans.

- responsible for designing UX and UI as well as implementing front-end
- supported blockchain verifiable transactions
- attended TechStars Summer 2016 accelerator program in NYC

Ruby on Rails developer @ <u>Hubbub Health</u> May, 2013 - February, 2015

I worked with a large team to incentivize employee wellness with the RoR app, hubbubhealth.com.

- developed Javascript for both modern and legacy browsers
- debugged user-submitted errors with New Relic and Papertrail
- managed assets via Amazon S3
- revived an out of date Rspec and Cucumber test suite for continuous integration
- optimized high traffic queries by replacing ActiveRecord calls with raw SQL
